

case study

secure online backup

Cube Partners are an independent firm of Chartered Accountants based in Northampton, UK, providing a full range of audit, accountancy, taxation and support services.

Working from offices in Northampton, Cube Partners pride themselves on their client relationships; aiming to deliver all services in a friendly, efficient and productive manner. With a client base consisting mainly of owner managed businesses, landed estates, private clients and other professionals, they required a professional data protection solution which would ensure that they are able to provide their customers with a consistent and reliable service.

Datastore 365 have provided Cube Partners with the technology that will ensure that backups are carried out on a regular basis throughout each day without interruptions to their systems. Online backup has eliminated the hidden costs & wasted man hours familiar with tape based procedure. This allows Cube Partners to concentrate all their efforts on what they do best - accountancy. Datastore 365 is now protecting all their data both on their server in the office and on their laptops when they are on the move.

“Online backup is a data protection solution that meets all our needs. Changing from a conventional tape backup system to online backup was quick and easy & we instantly saw a saving in manpower costs. Datastore 365 offers a solution all companies should have.”
