

case study

secure online backup

FGWatts
2010
FINANCIAL ADVISERS LIMITED

Previously part of FG Watts & Partners, FG Watts (Financial Services) Ltd are Independent Financial Advisers based in Northampton. With a team of qualified advisers they are proud to offer advice for a wide range of business & individual clients.

FG Watts (Financial Services) Ltd, has seen radical growth as a result of the demands of their clients and through the successful acquisition of other firms. As independent financial advisers, they are able to recommend products from the whole of the market place thus ensuring that they propose financial products that provide the best solution for their clients' needs.

With a team of highly qualified advisers, they are proud to be able to offer advice to a wide range of business and individual clients. As financial advisers regulated by the Financial Services Authority (FSA), FG Watts are legally required to have a data backup provision in place. They sought advice from Datastore 365 who were able to offer them an automated backup facility which protects all their business data on a daily basis and leaves FG Watts with the peace of mind that their data is secure 100% of the time.

Online backup also allows for a rapid recovery of data and saves a number of different versions of data which is invaluable in the event of any disasters.

"Datastore 365's online backup service has given us the confidence that our data is safely stored offsite & is protected by an automated schedule. More importantly, it helps us meet regulatory compliance by enabling our data to be restored with a level of speed and ease which is lacking in conventional tape backup methods."
