## How it Works

Still transferring your backups up to tape? That's a thing of the past with the Veeam Cloud Connect service from Datastore365.

It really is quite simple – you tell us how much storage you require, we create a Veeam repository in our cloud, you then connect to it from your Veeam installation and hey presto you're off the starting blocks!

**Veeam® Cloud Connect provides a fully integrated, fast and secure way to backup and restore from the cloud.**

## The #1 backup solution for virtualised environments.

## It's easy to add cloud backup

Veeam delivers powerful and reliable features and functionality to help you avoid the risk of catastrophic data loss. With Veeam Cloud Connect, you get:

- Dedicated Cloud Repository – Backups are made to a dedicated repository in our Cloud – fully scalable – just tell us how much storage you require.

- Hosted offsite backups: Get your backups offsite to a hosted cloud repository through a secure SSL connection with no additional Veeam licensing required

- Complete visibility and control: Access and recover data in hosted backup repositories directly from the backup console; track cloud repository consumption and receive reminders for hosted storage renewals

- A modern backup architecture: Leverage Veeam's modern backup technology, including Backup Copy jobs with Built-in WAN Acceleration, forever incremental backups, GFS (grandfather-father-son) retention policies and more—all built into one product

- End-to-end encryption: Rest easy by encrypting all data at source (before it leaves your network perimeter), in flight and at rest, without negatively impacting the data reduction ratios of built-in compression and WAN Acceleration.

## All of our services offer a 99.5% uptime service level guarantee.
