

FILE SYNC & SHARE

Full control

Datastore365's File Sync & Share is a highly secure, cloud based, enterprise level file sharing and collaboration solution designed from the outset to deliver the simplicity and ease of use associated with consumer level file sharing products like DropBox and Box, but with the security and management controls which are essential for enterprise IT use.

Using Datastore365's File Sync & Share means you only pay for what you use, safe in the knowledge that the IT administration team have full control over each user's storage allocation and has a full data tracking audit capability. This means that IT management can have full confidence in the security and integrity of the files that are being shared.

How is Datastore365 File Sync & Share different to other public file share services?

Data - stored in UK data centres so you know exactly where it is.

Security - Datastore365 File Sync & Share offers a higher level of security for file sharing through high levels of encryption when the data is in transit and rest.

Access Control - IT department can control who accesses the service and how long they are collaborating with third parties. Time limits can also be put on collaboration folders.

Audit Trail - there is full reporting on what users are uploading & downloading.

-  Easy file sharing for teams
-  Avoid the risks of consumer cloud applications
-  Access from anywhere
-  Extend sharing to mobile devices
-  Leverage private cloud infrastructure
-  Rapid, zero development deployment
-  Full integration with active directory

FILE SYNC & SHARE

- **Easy file sharing:** Empower end-users to collaborate with other departments or third party companies in a secure manner. Access to collaboration folders can be managed through time-based access controls, read/write privileges and time-limited sharing, with no IT staff involvement. Ad-hoc sharing of files with external users using time-limited unique URLs is also available.
- **Data available anytime from anywhere:** Access data from anywhere on a variety of devices such as PC's, laptops, tablets & smartphones. File synchronisation ensures data is also available offline.
- **Trusted & Secure:** With client-side encryption, data-at-rest encryption in the cloud and user-controlled encryption keys, Datastore365's File Sync & Share provides a secure alternative to non-secure public cloud services.
- **Extend sharing mobile devices:** Datastore365's File Sync & Share Mobile App integrates with its cloud file sharing mechanism and provides file access and collaboration capabilities from mobile devices including iPhone, iPad and Android devices. In today's distributed enterprise the need to share information has gone beyond what traditional systems can provide.

All of our services offer a 99.5% uptime service level guarantee.
