

VIRTUAL DISASTER RECOVERY

It's never been simpler.

There has never been a better time to explore how a cloud based disaster recovery solution can help you protect your virtual or physical infrastructure from unexpected outages. While not right for every business, organisations that have traditionally associated advanced infrastructure disaster recovery with redundant servers or costly, inflexible third-party service agreements are taking notice of Datastore365's disaster recovery as a service (DRaaS).

DRaaS offers rapidly deployable solutions that combine the flexibility and scalability of a shared resource model, with 24x7 support to deliver peace of mind. Datastore365's Virtual DR (DRaaS) enables your business to have your systems up and running quickly and efficiently without the cost of traditional hardware and remote sites. Recovering a single server or entire infrastructure has never been simpler.

Rapidly deployable solutions to deliver peace of mind.

Business Benefits

- Minimises downtime and the impact of your business by recovering data quickly
- Expands to match the growth of your business
- Reduces your capital expenditure by removing the need to buy expensive backup servers
- Scales to meet your business needs
- Minimises the impact of disasters on your business by restoring systems in minutes
- Gives you peace of mind that your data safe
- Reduces loss of service and revenue
- Saves your IT department time

For IT departments being asked to do more with less, disaster recovery delivered as a service and managed in the cloud offers a cost effective way to secure data.

By taking advantage of Datastore365's Cloud2Day platform as a secondary site, you can move the investment from a capital to an operational expense with affordable fees and no upfront investment or reinvestment.

VIRTUAL DISASTER RECOVERY

DRaaS also allows you to keep up with the demands for heightened security, availability and compatibility. By moving disaster recovery to a shared resource model, available through the cloud and managed as a service, IT can be freed to focus on the future with the confidence that their data is secure.

- Ability to shift disaster recovery costs from a capital expense to an operational expense model.
- Flexibility to expand or reduce service levels as business needs change—with minimal cost impact and without having to re-negotiate service level agreements or add new multi-year commitments.
- Extend IT teams by providing 24x7 access to manpower and skill sets to design end-to-end solution with optimal price / performance.

*additional Professional Services charges apply.

Same day recovery: Datastore365's Same Day Virtual DR (DRaaS) Service offers you a same business day service level agreement. There are multiple technologies which we may leverage to deliver the appropriate DR which is perfectly suited to your requirements.

One hour recovery: Datastore365's One Hour Virtual DR (DRaaS) Service replicates your on-premise servers on a one to one basis to their virtual counterparts residing on Datastore365's vCloud Powered Cloud2Day platform. As a result your protected servers are able to fail over to their mirrors just minutes after a system failure. One hour recovery is ideal for businesses that can't afford to be without their systems for more than one hour.

"Datastore365's DraaS has eliminated the need for manual DR testing and guarantees that our RPO and RTO for email & other business critical IT Services can always be met...whatever the scenario."

All of our services offer a 99.5% uptime service level guarantee. If you would like to discuss this or any other of our cloud based services please contact us today on 08000 481 848.
