

“ We are very happy with the overall service we receive from Datastore365. The migration process itself was seamless, and they are always very quick to deal with any queries we may have. ”

Rhino Pro

 **datastore365**
the cloud specialists

Rhino Pro is a holistic umbrella company offering a personal payroll solution to any temporary worker or contractor in any industry. The products available are tailored to suit a variety of employment situations. Based in Northampton, we offer nationwide services.

We were having issues with our Remote Desktop solution in Microsoft Azure and felt we couldn't get the level of support we needed to make it work efficiently for us. Servers that were running slowly, or disconnecting us completely, were causing lost man hours on a frequent basis.

They are locally based, offering very competitive pricing, and they were also able to be flexible with the specifications of our Remote Desktop solution. This flexibility allowed us to cut the overall monthly costs of our virtual infrastructure.

Using Datastore 365's services allow us to re-assure customers that their data is secure, being stored in the UK backed by security accreditations such as ISO:27001. Since migrating our services out of Azure and into Datastore365's private cloud we have seen a notable improvement in performance.
