the cloud specialists

oriordanbond

Oriordan Bond was formed some twenty-three years ago when Tim O’Riordan and Simon Bond opened their first branch in Northampton. They now have eight offices that are in the heart of local communities across Northampton and have grown to employ a team of seventy experienced professionals who work with each other to deliver a one stop shop when selling or renting property.

With the growing risks of cybercrime, we needed the extra peace of mind knowing that our data is backed up securely, in multiple locations and encrypted to the highest levels.

We know that we can tell Datastore365 what we want and then allow them to go away and come back with an IT solution that works for us. Being ISO:27001 accredited also means we have peace of mind that they take data security seriously. Businesses are built on data and you need to be confident that the people you are trusting it with, will take good care of it.

The biggest benefit is having the peace of mind that our critical data is in a safe environment, encrypted to military standard and stored in tier 4 datacentres. The datastore team monitor our backups daily so it allows us to focus on our business and what we do best.

We have no hesitation in using Datastore365 to back up and protect our critical data. With the growing risks of cyber-crime we have extra peace of mind knowing the data is fully encrypted at source and backed up securely across Tier 4 data centres.
